MEDICAL REPORT

RE: ENUMA DAVID UZOCHUKWU

SEX: MALE AGE: 29 YEARS

The above named is a case of bronchial asthma with difficulty in breathing, he was seen in this hospital with complaints of weakness, loss of appetite, chest tightness and chest pain.

A preliminary diagnosis of bronchial asthma was made

Investigation revealed Malaria and Asthmatic attack. He has since been receiving treatment and on several cases been placed on Intranasal Oxygen, Ventolin Aminophylline, Multivitamins, Analgesics, Hematinic with Cardiac Modulators to follow up closely in clinic.

In view of the above, kindly assist him to avoid all kinds of serious activities and to stay where facilities are available for adequate health care during his Youth Service Program in camp to avoid emergencies.

We strongly recommend he should be redeployed back to AKWA IBOM STATE, where he can be closer to the hospital for constant treatment and monitoring.

Thank you for your assistance in managing this patient.

MEDICAL OFFICER:

Anthony obi
